QUESTION 1

An operator has been tasked with using vRealize Operations to determine whether sufficient capacity exists within a production vSAN Cluster to add another 100 workloads.

Which two actions should be taken to complete this task? (Choose two.)

A. Create a new Add VMs Scenario using the Workload Planning: Hyperconverged and VMC on AWS option.

B. Create a new Add VMs Scenario using the Workload Planning: Traditional option.

C. Select Plan from the Quick Start Page.

D. Select Assess Capacity from the Quick Start Page.

E. Select Rightsize from the Quick Start Page.

Correct Answer: BD

QUESTION 2

An administrator is trying to deploy the SaltStack Config to an existing environment in vRealize Lifecycle Manager. However, the checkbox to mark that product is grayed out and cannot be selected.

What could be causing this problem?

A. vRealize Operations Manager is not installed in this environment.

B. The administrator does not have permission to install this product.

C. The administrator already deployed it as part of another environment.

D. vRealize Automation is not installed in this environment.

Correct Answer: A

QUESTION 3

Why would the health status of an environment be missing in vRealize Suite Lifecycle Manager (vRSLCM)?

A. Identity Manager is not deployed in the environment.

B. vRealize Log Insight is not deployed in the environment.

C. The SDDC Management Health solution pack is not configured in vRealize Operations Manager.

D. The vRSLCM Management solution pack is not configured in vRealize Operations Manager.

Correct Answer: C

QUESTION 4

Which VMware Cloud Service is used to establish end-to-end flow monitoring for communication between virtual machines across clouds?

A. vRealize Operations Cloud

B. vRealize Log Insight Cloud

C. vRealize Automation Cloud

D. vRealize Network Insight Cloud

Correct Answer: D

QUESTION 5

Which action must be performed to add information to a vRealize Log Insight dashboard provided by a Content Pack?

A. Clone the Content Pack dashboard, and edit the clone.

B. Rename the Content Pack dashboard, and edit it.

C. Modify the existing Content Pack dashboard.

D. Create a new Content Pack dashboard.

Correct Answer: D

QUESTION 6

An administrator wants to further explore guest-level system details for an object that is being investigated in vRealize Operations troubleshooting Workbench.

Which tab should the administrator visit to get the required details?

A. Metrics

B. Alerts

C. Logs

D. Events

Correct Answer: A

QUESTION 7

The storage team has just deployed a SAN from a new vendor. The operations team has asked for it to be monitored, but a vendor specific management pack must be downloaded and installed first.

Where should this task be completed?

A. In the administration interface of vRealize Log Insight

B. Under the Infrastructure menu in Cloud Assembly

C. Under Cloud Accounts in the Administration tab in vRealize Operations Manager

D. In the Marketplace feature of vRealize Suite Lifecycle Manager

Correct Answer: C

QUESTION 8

An administrator needs to provide a support team access to live data from within vRealize Operations to troubleshoot an on-going application performance issue.

Which actions should the administrator take to help the support team?

A. Create an Alert Definition, and configure an outbound notification.

B. Create a Report, and configure a daily schedule.

C. Create a Dashboard, and configure dashboard sharing.

D. Create a Capacity Scenario, and automatically share the capacity remaining results.

Correct Answer: A

QUESTION 9

To reduce the possibility of unnecessary outages to critical production applications, an administrator has been tasked with ensuring that all shut down and reboot Day 2 operations for deployments within a project are only completed if the service owner gives permission.

Which type of Service Broker policy should an administrator configure to meet this objective?

A. Resource Quota

B. Lease

C. Day 2 Action

D. Approval

Correct Answer: C

QUESTION 10

An administrator wants to assign a role to a new Active Directory group so that users can request services from the service catalog.

Which action should the administrator take to achieve this goal?

A. From the Identity and Access Management tab in vRealize Automation, assign the group the Service Broker User role only.

B. From the Identity and Access Management tab in vRealize Automation, assign the group the Service Broker User and Organization member roles.

C. From the Identity and Access Management tab in Workspace One Access, assign the group the Service Broker User role only.

D. From the Identity and Access Management tab in Workspace One Access, assign the group the Service Broker User and Organization member roles.

Correct Answer: C
